WHERE IS YOUR SHOULDER, ELBOW, & WRIST PAIN COMING FROM?

Give Chronic Pain the Cold Shoulder

It's time to say goodbye to shoulder, elbow, and wrist pain once and for all. Identifying the cause of your pain and taking steps to combat ill habits that may be contributing to your discomfort can have a significant impact on your quality of life.

Wave goodbye to pain in your hands, shoulders, elbows and wrists with targeted techniques from your experienced physiotherapists.

What is Causing the Pain?

Think about the tasks that make up the majority of your day-to-day life. It is often said that life in the 21st century is way easier on the body than life during any other time in human history — and it's true that there is a fair amount of evidence to support this idea. Rather than spending all of your days working in a factory or on a farm, the vast majority of Americans work indoors, often at a computer for a predetermined number of hours week after week. But this new lifestyle isn't exactly harmless for the body, either.

There are plenty of ways in which the common tasks of 21st-century life put the body under a great deal of stress. Sedentary lifestyles frequently contribute to weight gain, which increases your risk for a long list of obesity-related diseases. This puts additional stress on your body, which could result in pain in crucial joints like your shoulders,

elbows and yes, even your wrists. But even aside from that, there are a lot of potential issues that your body can face as a result of sedentary behavior in the workplace — including shoulder, elbow, and wrist pain.

Shoulder, elbow, and wrist injuries are especially common as a result of workplace injury and overuse. While it is sometimes possible to take action to prevent an injury from developing, it is especially important to be able to recognize when an injury develops and to understand ways that you can combat that injury by identifying what may have caused the pain to develop in the first place.

Common issues that can lead to shoulder, elbow, and wrist pain include:

- Issues with poor posture
- Athletic injuries
- Carpal tunnel syndrome, which can develop from overuse of the wrist and regular, repetitive motions, such as typing
- Muscle sprain
- Muscle strain
- Dislocation or hyperextension of the joints
- Heavy lifting

Handling Your Pain

One of the biggest concerns regarding pain in the shoulder, elbow, and wrist is that it is difficult to impossible to actually allow these parts of the body time to rest. Every movement and action requires these body parts — and when the pain develops in both arms, as it often does, treating the pain becomes even more complicated. It is impossible to care for your basic needs without involving your shoulder or wrist, let alone get through a day at the office.

This is why so many issues regarding pain in the shoulder, elbows, and wrists typically become chronic. Since it is difficult to allow these body parts time to properly rest, they continue being overused and the pain can actually worsen.

Treating Shoulder, Elbow and Wrist Pain.

Addressing the pain early on is the best way to prevent an issue from becoming chronic. Turning to medication and braces for pain management is not a long-term solution and will only push off the inevitable truth — that you need to find a solution for the problem that is causing you pain.

Physiotherapy is the ideal tool for support in this regard. Working with a physiotherapist will provide you with an opportunity to understand what movements may be causing further discomfort, and can help you to strengthen the surrounding muscles while improving range of motion, which together will likely alleviate some of the pain associated with your injury.

Don't assume that pain in your shoulder, elbows, or wrists will go away on its own. It is more common for the pain to worsen, and compensating for the pain by overusing the opposite arm can cause further injury to develop. For support with learning how to manage the pain, and to learn exercises and techniques that can help you overcome the injury and restore proper strength and functionality to your shoulders, elbows, and wrists, contact your physiotherapist.

Clinic News: *Virtual Terry Fox Run*

The Terry Fox Run: September 19, 2021

Be part of a movement inspired by Terry to raise funds for cancer research. We are running a virtual run as a clinic along with family on the 19th in the neighbourhood. You can donate to our team at tinyurl.com/abn44njn today! Alternatively, you can search on terryfox.org for a team to donate to.

Who was Terry Fox?

Terry Fox was a Canadian athlete, humanitarian, and cancer research activist. After losing his leg to cancer at only 18 years of age, Terry set out to do the impossible: run across Canada, one marathon a day, in pursuit of his dream to find a cure for cancer.

3 Tips To Improve Nutrition In The Fall

Harvest Your Herbs

Herbs tend to have higher levels of antioxidants and other phytonutrients than other types of vegetables. So even though we tend to eat them in relatively small quantities, herbs can add a lot of nutrition to foods.

Become A Soup Chef

Getting into the habit of making a big pot of soup every weekend is a great way to improve your nutrition all week long. If you're using a pressure cooker or slow cooker, they also need very little supervision while they are cooking.

Make A New Fermented Friend

Probiotic foods help to promote the growth of helpful bacteria in your gut. Good gut bacteria can aid in digestion, nutrient absorption, and help you maintain a healthy weight.

Healthy Recipe *Buddha Noodles*

- 12 oz. package udon noodles
- 3 tbsp. smooth peanut butter
- 3 tbsp. soy sauce
- 2 tbsp. sesame oil
- 1 tbsp. honey
- 1 tbsp. lime juice
- 1 clove garlic, minced
- 2 c. Shredded chicken
- 2 c. broccoli florets, steamed
- 2 avocados, thinly sliced
- 2 green onions, thinly sliced
- 1 tsp. sesame seeds

In a large pot of salted boiling water, cook noodles according to package instructions. Drain noodles and rinse with cold water to cool. Return noodles to saucepan. Add peanut butter, soy sauce, sesame oil, honey, lime juice and garlic. Stir until sauce is creamy and noodles are fully coated. If the sauce is too loose, turn heat to low and cook until the sauce has thickened, about 1 minute. Divide noodles between bowls. Top each serving with chicken, broccoli, avocado and green onions. Garnish with sesame seeds and serve warm or at room temperature.
